

CARE & MAINTENANCE MANUAL

ZENITH QUARTZ™ COUNTERTOP IS:

Heat resistant, but may be damaged by sudden extreme heat due to thermal shock and excessive heat may cause the polyester binder to contract, leaving the surface exposed to heat feeling rough to touch and/or discolored. To maintain the natural beauty of Zenith Quartz® do not place roasting pans or hot skillets directly on the surface use a trivet instead.

Scratch resistant but not indestructible. Zenith Quartz® is 93% Quartz and can be scratched by materials harder than the quartz as an example; the bottom of certain ceramic dishes may be abrasive enough to scratch your Zenith Quartz® countertop. Zenith Quartz® is extremely durable and resists scratching, staining, and scorching better than any other natural stone or solid surface.

It can also be damaged by impact. Do avoid excessive force or pressure because that may cause the countertop to crack, mar or chip the surface. Please avoid use as a cutting board and use a cutting board instead for purposes of cutting.

SIMPLEST CARE & MAINTENANCE

For everyday cleaning:

- Dip a soft cloth in warm water with **Non-abrasive soap**.
- Rinse with water and dry with a soft cloth.
- Do not leave wet spills, to prevent limescale forming.
- Do not use **harsh chemicals**.

HARD AND STUBBORN SPILLS

Gum, paint

- Scrape off the residue with a sharp wooden blade or putty knife prior to cleaning.
- Clean with a non-abrasive soap and warm water.
- Rinse with water and dry with a soft cloth.

Oils, grease

- Clean with a non-abrasive soap and warm water.
- Rinse with water and dry with a soft cloth.

Coffee, tea, mustard, food coloring

- Clean with a non-abrasive soap and warm water.
- Rinse with water and dry with a soft cloth.

Hard and stubborn stains

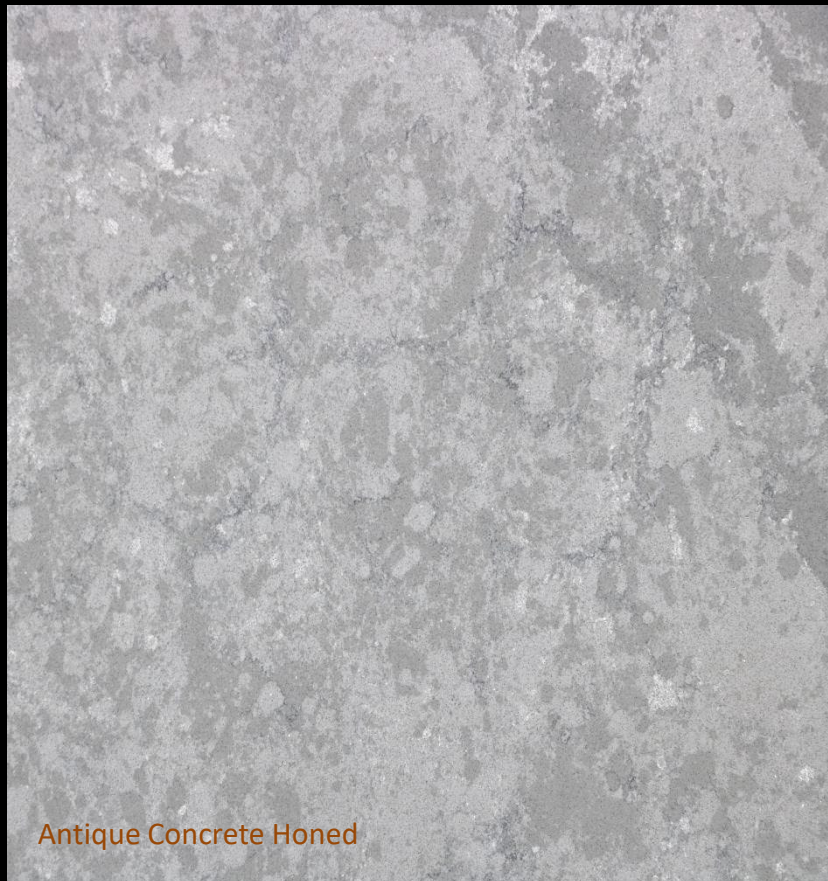

- Mix in a Boal non-abrasive soap, warm water, and vinegar. Use locally on the stain then Rinse with water, and dry with a soft cloth.

Or

- Use VIM Cream Multi-purpose Cleaner locally on the stain then Rinse with water, and dry with a soft cloth.

ZENITH QUARTZ™

LEATHER, MATT & HONED SURFACES

Zenith Quartz® Leather, Matt, Honed and surfaces other than polished for countertops **does** require daily maintenance.

For your daily cleaning routine we recommend Countertop Magic™. Follow written instructions on the bottle.

Honed finishes require more frequent cleaning to maintain their appearance. Metal marks, fingerprints and other signs of daily living will be more apparent. Visible marks such as these can be removed by using a non-abrasive pad and any of the recommended cleaning products.
